FAQs and Facts

Attention Users: Please see www.californiadgstats.ca.gov for the latest CA solar data and statistics.

www.californiasolarstatistics.ca.gov will be retiring on Friday May 29, 2020. Please update your bookmarks and references accordingly. All data and information will be archived and available on California DG Stats.

Cost Distribution

This figure shows the distribution of system costs within the CSI Program for all completed projects, displaying the cost range on the X-axis and the percentage of filtered applications on the Y-axis. Two sets of filters are available to allow for comparison between filtered data sets. Each set can be filtered by Program Year, Sector, and Program Administrator. Capacity type and inflation adjustments may also be selected with the global filters found at the top of the figure.

This report is current as of May 28, 2020.

Cost Distribution

¹Costs for systems owned by third parties versus host customers (\$/watt) cannot be directly compared. See the [FAQ page](#) for details.

²Program Year is set by the first of the following reservation dates: "Reserved Reservation", "Confirmed Reservation" or "Pending RFP". "Range" only includes projects that have an assigned Program Year. "All Years" also includes projects which have not yet been reserved.

³The SASH Program is administered by GRID Alternatives.
