FAQs and Facts

Attention Users: Please see www.californiadgstats.ca.gov for the latest CA solar data and statistics.

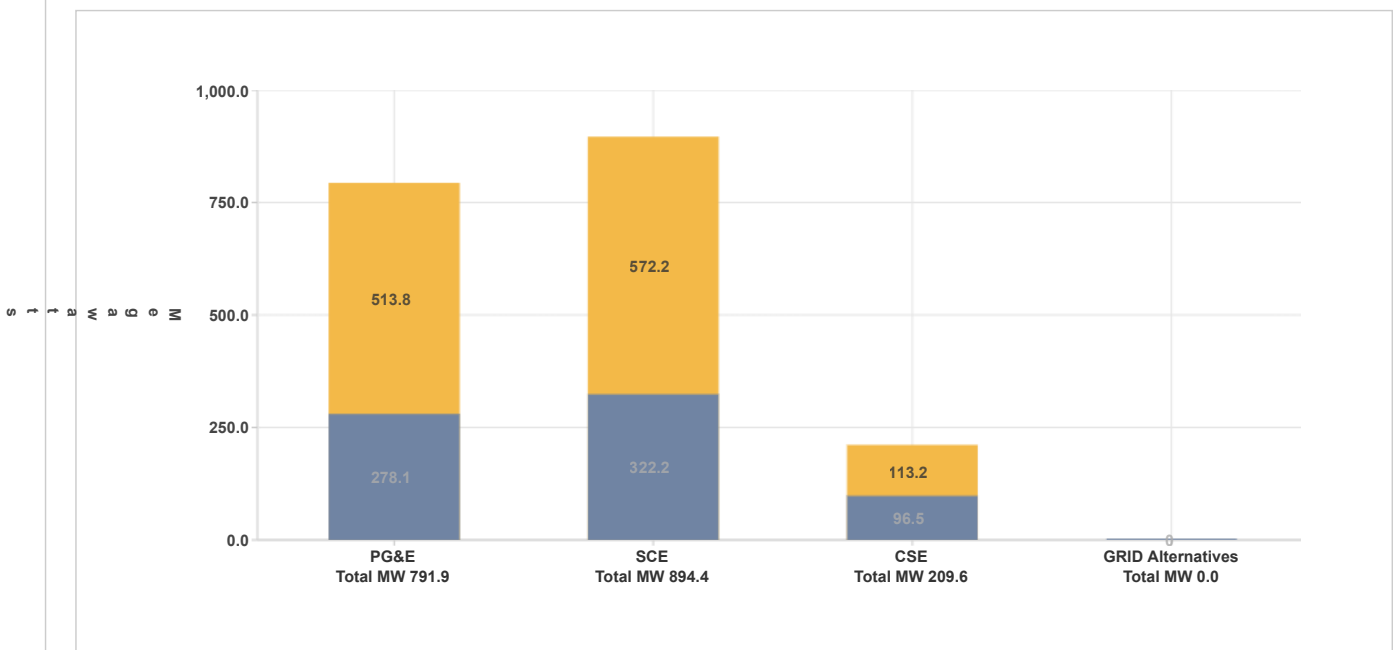

www.californiasolarstatistics.ca.gov will be retiring on Friday May 29, 2020. Please update your bookmarks and references accordingly. All data and information will be archived and available on California DG Stats.

Program Totals by Administrator

This figure summarizes solar project data for each Program Administrator (PG&E, SCE, CSE and GRID Alternatives) by number of applications, capacity (MW), or incentive amount. The figure can be further refined to display information by application status and host customer sector. Select the Table view below to display totals for each data type.

This report is current as of May 28, 2020.

Program Totals by Administrator

143,230 application(s) were included for the generation of this chart.

When an application is processed it goes through different statuses. These are described [here](#)

¹The SASH Program is administered by GRID Alternatives. Only SASH Program data is displayed in the GRID Alternatives column of the Program Totals figure.

²Pending applications are considered to be those between the "Reservation Request Review" and the "Online Incentive Claim Request Submitted" statuses.

³Installed applications are considered to be those between the "Incentive Claim Request Review" and the "Completed" statuses.

⁴Program Year is set by the first of the following reservation dates: "Reserved Reservation", "Confirmed Reservation" or "Pending RFP". "Range" only includes projects that have an assigned Program Year. "All Years" also includes projects which have not yet been reserved.
For a further breakdown of data by status, please refer to figure "Application Status".
